

Mohd Umar Khan

ANDROID DEVELOPER

Profile

I am a passionate and dedicated Android Developer with a strong command of Jetpack Compose, Java, and Kotlin. My expertise lies in developing user-friendly and efficient Android applications, with a particular focus on using Jetpack Compose for modern, declarative UI design.

In addition to my Android development skills, I have a solid understanding of Data Structures and Algorithms using Java.

If you're looking for an Android Developer who is not only technically skilled but also constantly striving to grow and contribute to your team, feel free to connect with me or send a message.
